EDUCATION

The University of Texas at Austin

Master of Science, Information Technology & Management

• Overall GPA: 3.98 - Advanced Programming & Web App Development, Product Management, Project Management, Strategic Change & IT Management, Business Data Science, Digital Technology & Innovation, Design Thinking

Tecnológico de Monterrey (ITESM)

Bachelor of Science, Industrial Engineering with Minor in Systems Engineering

- Overall GPA: 9.81/10 Honors and Excellence Award (top 5% of class)
- Purdue University Semester Abroad: Finance, Accounting and Marketing (Fall 2022) Dean's List & Semester Honors

EXPERIENCE

Syscap – Business Analyst; Monterrey, Mexico

- Developed Python tools to streamline the analysis of 50+ NBFIs for structured debt opportunities, increasing potential AUM by \$7M+ USD in under a year while monitoring risk and operations of a \$15M USD existing portfolio.
- Spearheaded the definition of 3 product features for borrowers and lenders, using the Shape Up methodology to improve team agility and align with evolving customer needs.

Tecnológico de Monterrey – Part-time Professor; Monterrey, Mexico

- Designed and taught 650+ slides on programming and digital transformation made for undergrad accounting students.
- Achieved a 9.9/10 student satisfaction rating, ranking in the top 11% of professors system-wide in the first semester.

SpeeDee Oil Change and Auto Service Mexico – Brand Manager Intern; Monterrey, Mexico August 2019 – June 2023

- Led the digital transformation of SpeeDee Mexico, revamping the website and social media strategy to boost engagement, generate 300+ monthly appointments, and attract 300+ new franchisee leads nationwide.
- Orchestrated monthly ad campaigns on Facebook and Instagram, optimizing a yearly budget of \$15,000 USD to drive more sales and revenue for SpeeDee centers and reducing the cost per result (CPR) from \$4.5 to \$0.03 USD

PROJECTS

Pokemon Autoclicker – Interactive Web-Based Game

- Built a full-stack Pokémon-themed autoclicker game using Ruby on Rails, Turbo, and Stimulus, featuring real-time updates, passive income mechanics, and a personalized Pokédex to track over 1,000 Pokémon as well as shinies.
- Implemented user authentication with Devise, styled the UI with custom HTML and CSS for a clean, game-inspired experience and deployed a live playable version to Heroku using PostgreSQL as the database.

Resource Management Software – Full-Stack Web App Development

• Engineered a user-friendly resource management web app using React and Python Flask, enabling seamless user creation, resource tracking, and project allocation with MongoDB as the NoSQL database solution.

TECHNICAL SKILLS

- Languages & Frameworks: Ruby, Rails, Python, HTML, CSS, JavaScript, SQL, React, GDScript, MongoDB
- **Certifications:** AWS Solutions Architect Associate, Tableau Desktop Specialist, Data Engineer Assoc.
